Beam Interactions with Materials & Atoms

Contents

Editorial vii

Committees and Sponsors viii

I. Ion–Electron Interaction and Electronic Stopping Power

Electron ejection from solids by heavy ions at high energies (1–100 MeV/u)
H. Rothard 1
Dynamic screening of fast heavy ions in solids
V.H. Ponce, F.J. Fuhr, J. Díaz Valdés and F.J. García de Abajo 11
Resonant coherent excitation of 390 MeV/u Ar ions planar channeled in Si crystals
K. Komaki, T. Azuma, T. Ito, Y. Takabayashi, Y. Yamazaki, M. Sano, M. Torikoshi, A. Kitagawa, E. Takada and T. Murakami 19
Swift cluster–atom collisions: a progress report
K. Wohrer, M. Chabot, R. Fossé, D. Gardès, P.A. Hervieux, F. Calvayrac, P.G. Reinhard and E. Suraud 29
Enhancement of binary encounter electron emission in collisions of highly charged ions with helium gas targets
U. Ramm, U. Bechthold, O. Jagutzki, M. Damrau, S. Hagmann, G. Kraft, H.D. Böttcher and H. Schmidt-Böcking 39
Intra-atomic double scattering of Binary Encounter electrons in heavy ion collisions with gas targets
U. Bechthold, J. Ullrich, U. Ramm, G. Kraft, S. Hagmann, C.O. Reinhold, D.R. Schultz and H. Schmidt-Böcking 46
Electron capture to selective excited states in ion–H_2 collisions
H.F. Busnengo, S.E. Corchs and R.D. Rivarola 52
The absorption-edge technique at the gas-jet target of the ESR
A. Krämer, Th. Stöhlker, F. Bosch, T. Ludziejewski, H.F. Beyer, C. Kozhuharov, D. Liesen, P.H. Mokler, P. Rymuza, Z. Stachura, P. Swait, A. Warczak 57
Measurement of the spectral shape for the two-photon decay in heliumlike gold
H.W. Schäffer, P.H. Mokler, R.W. Dunford, C. Kozhuharov, A. Krämer, T. Ludziejewski, H.-Th. Prinz, P. Rymuza, L. Sarkadi, Th. Stöhlker, P. Swiat and A. Warczak 62
Multiple ionization of argon by 170 MeV S^{9+} ions
X. Ma, H. Liu, Y. Wang, Z. Yang, X. Chen, Z. Shen, K. Lu, X. Cai and Z. Liu 67
Plasmon-assisted electron capture into multiply-charged Ne^{q+} ions interacting with an Al surface
D. Niemann, M. Grether, M. Rösler and N. Stolterfoht 70
Electronic excitation in transmission of relativistic H^- ions through thin foils
C.O. Reinhold, P. Kürpick, J. Burgdörfer, S. Yoshida, B. Gervais 76
Velocity effect in secondary electron emission below and above the electronic stopping power maximum
R. Wünsch, R. Neugebauer, T. Jalowy, D. Hofmann, H. Rothard and K.O. Groeneveld 82
Effective stopping-power charges of swift heavy ions in gases
G. Maynard, D. Gardès, M. Chabot, M. Nectoux, C. Deutsch 88
Charge dependent energy loss of 60 MeV $^{58}Ni^{q+}$ ions in argon gas
O. Schmelmer, G. Dollinger, C.M. Frey, A. Bergmaier and S. Karsch 95
Energy loss of Ni ions transmitted through C foils at MeV energies: a charge state approach
J.S. Dolado, R. Diez Muino, A. Arnau 101

0168-583X/98/$ – see front matter © 1998 Elsevier Science B.V. All rights reserved

Universal fit formula for electronic stopping of all ions in carbon and silicon
G. Konac, C. Klatt and S. Kalbitzer 106
Usage of a corrected Bethe–Bloch formula for charge identification of fast ions with $Z \geqslant 30$ recorded in polycarbonate track detectors
C. Domingo, J. Font, C. Baixeras, Ll. Font and F. Fernández. 114
A new hemispherical analyser with 2-D PSD and focusing lens for use in 0° electron spectroscopy
E.P. Benis, K. Zaharakis, M.M. Voultsidou, T.J.M. Zouros, M. Stöckli, P. Richard and S. Hagmann . . 120
Mobile UHV set-up for the investigation of electron spectra at large accelerators: First results on high charge effects
M. Caron, H. Rothard, M. Jung, V. Mouton, D. Lelièvre, M. Beuve and B. Gervais 126

II. Relaxation of the Electronic Excitation Energy in Solids

An experimental determination of electron temperatures in the center of nuclear tracks in amorphous carbon
G. Schiwietz, G. Xiao, P.L. Grande, E. Luderer, R. Pazirandeh and U. Stettner 131
Heating of metals in swift heavy ion tracks by electron–ion energy exchange
A.E. Volkov and V.A. Borodin 137
Track formation in amorphous metals under swift heavy ion bombardment
Yu. Yavlinskii 142
Dissipation of MeV ion energy in solids, structure formation and phase changes
P. Sen, G. Aggarwal and U. Tiwari 147
Macrocluster effect caused by single multiply charged ions: masses of gold nanoclusters (3–30 nm) arising as a result of electronic processes induced by fission fragment bombardment in ultradispersed targets of gold
I. Baranov, A. Novikov, V. Obnorskii and C.T. Reimann 154
Measuring sputtering yields of high energy heavy ions on metals
H.D. Mieskes, W. Assmann, M. Brodale, M. Dobler, H. Glückler, P. Hartung and P. Stenzel 162
Electronic excitation effect in the sputtering of conductive materials bombarded by highly charged heavy ions
T. Sekioka, M. Terasawa, T. Mitamura, M.P. Stöckli, U. Lehnert and C.L. Cocke 172
Temperature dependence of ion formation in the nuclear track plasma
K. Wien and C.S.C. de Castro 178
Li^+ secondary ion energy distributions probed by fast N_2^+ and N^{q+} bombardment of LiF
J.A.M. Pereira and E.F. da Silveira 185
Luminescence in thin molecular samples by bombardment with single MeV atomic ions
K. Koch, W. Tuszynski, Ch. Tomaschko and H. Voit. 190
Photon emission under MeV carbon cluster impact for probing cluster–solid interactions
K. Koch, W. Tuszynski, C. Tomaschko and H. Voit. 198

III. Materials Modification
IIIa. Metals

Dynamics of viscoelastic flow in ion tracks: origin of plastic deformation of amorphous materials
H. Trinkaus. 204
Vizualization by near-field microscopy of the impacts of swift heavy ions in amorphous metallic alloys
A. Audouard, R. Mamy, M. Toulemonde, G. Szenes and L. Thomé 217
Characterisation by various microscopic techniques of the damage created by MeV C_{60} ions in amorphous Ni_3B
A. Dunlop, J. Henry and G. Jaskierowicz 222
Something new about the giant deformation of amorphous alloys irradiated with GeV ions
A. Audouard, M. Toulemonde, G. Szenes and L. Thomé 233
Stability of $Al_{0.75}Ni_{0.25}$ amorphous zones induced by Ni ion implantation into pure aluminium
A. Cuenat, R. Schäublin, A. Hessler-Wyser and R. Gotthardt 238

Evidence for recrystallization of amorphous Fe/Tb multilayers under swift ion irradiation
J. Juraszek, A. Fnidiki, J. Teillet, F. Richomme, M. Toulemonde and W. Keune 244
Swift heavy ions for magnetic nanostructures
J.P. Nozières, M. Ghidini, N.M. Dempsey, B. Gervais, D. Givord, G. Suran and J.M.D. Coey 250
Evidence for a high T_c magnetic amorphous polymorph obtained by swift heavy ion irradiation
M. Ghidini, J.P. Nozières, F. Bolzoni, G. Suran, J.F. Gregg and B. Gervais 260
Swift heavy ion irradiation effects in Pt/C and Ni/C multilayers
A. Gupta, S. Pandita, D.K. Avasthi, G.S. Lodha, R.V. Nandedkar 265
Swift heavy ion induced formation of α-$FeSi_2$
W.Assmann, M. Dobler, D.R. Avasthi, S. Kruijer, H.D. Mieskes, H. Nolte 271
Precipitation of copper in iron under swift ion irradiation
A. Barbu, P. Pareige, V. Jacquet 278
TEM observations of iron and nickel foils irradiated by MeV fullerenes at room temperature
H. Dammak, A. Dunlop 285
Modification of defects induced by nuclear collisions in Fe and Ni in electronic stopping power regime
Z.G. Wang, Ch. Dufour, Y.F. Jin, M.D. Hou, G.M. Jin, E. Paumier 290

IIIb. Semiconductors

Latent tracks formation in silicon single crystals irradiated with fullerenes in the electronic regime
B. Canut, N. Bonardi, S.M.M. Ramos, S. Della-Negra 296
Latent tracks formation in silicon irradiated by 30 MeV fullerenes
A. Dunlop, G. Jaskierowicz, S. Della-Negra 302
Heavy-ion induced damage of crystalline Ge and W in the 0.5-8 A MeV range
H. Huber, W. Assmann, S.A. Karamian, H.D. Mieskes, H. Nolte, E. Gazis, M. Kokkoris, S. Kossionides, R. Vlastou, R. Grötzschel, A. Mücklich, W. Prusseit 309
A comparative study of induced damage after irradiation with swift heavy ions, neutrons and electrons in low doped silicon
P. Mangiagalli, M. Levalois and P. Marie 317
Impact of high energy ion implantation on dopant distribution in silicon
E.P. Neustroev, I.V. Antonova, V.I. Obodnikov, V.P. Popov, V.A. Skuratov, S.A. Smagulova and A.Y. Didyk 323
Study of intrinsic defects in semiconductors with radioactive probes
R. Sielemann 329
Damage formation in InP due to high electronic excitation by swift heavy ions
W. Wesch, O. Herre, P.I. Gaiduk, E. Wendler, S. Klaumünzer and P. Meier 341
Studies of the near-surface layers of silicon crystals implanted with fast ions
D. Żymierska, D. Klinger, J. Auleytner, T. Czosnyka and L. Datsenko 350
Tracks of high energy heavy ions in HOPG studied with scanning tunneling microscopy
J. Liu, M.D. Hou, C.L. Liu, Z.G. Wang, Y.F. Jin, P.J. Zhai, S.L. Feng and Y. Zhang 356

IIIc. Insulators

Excitonic model of track registration of energetic heavy ions in insulators
N. Itoh and A. Marshall Stoneham 362
Radiation defects in lithium fluoride induced by heavy ions
C. Trautmann, K. Schwartz, J.M. Costantini, T. Steckenreiter and M. Toulemonde 367
Tracks formation on LiF crystal surface due to grazing incidence of 1 MeV/u Sn ions
I.V. Vorobyova 379
Luminescence of LiF and α-Al_2O_3 crystals under high density excitation
V.A. Skuratov 385

Scanning force microscopy of heavy-ion tracks in lithium fluoride
A. Müller, R. Neumann, K. Schwartz and C. Trautmann 393
Microscopic observations of metallic inclusions generated along the path of MeV clusters in CaF_2
J. Jensen, A. Dunlop and S. Della-Negra 399
Craters, bumps and onion structures in MoS_2 irradiated with MeV C_{60} ions
J. Henry, A. Dunlop and S. Della-Negra 405
A comparison between tracks created by high energy mono-atomic and cluster ions in $Y_3Fe_5O_{12}$
J. Jensen, A. Dunlop, S. Della-Negra and M. Toulemonde 412
Monoatomic and cluster ion irradiation induced amorphous tracks in yttrium iron garnet
G. Szenes 420
Out-of-plane swelling of gadolinium gallium garnet induced by swift heavy ions
M. Toulemonde, A. Meftah, J.M. Costantini, K. Schwartz and C. Trautmann 426
Sputtering of vitreous SiO_2 and $Y_3Fe_5O_{12}$ in the electronic stopping power region: A thermal spike description
A. Meftah, M. Djebara, N. Khalfaoui and M. Toulemonde. 431
Nanometric size effects on irradiation of tin oxide powder
A. Berthelot, S. Hémon, F. Gourbilleau, C. Dufour, E. Dooryhée and E. Paumier 437
Influence of the grain size: yttrium oxide irradiated with swift heavy ions
S. Hémon, C. Dufour, F. Gourbilleau, E. Paumier, E. Dooryhée and S. Bégin-Colin. 443
Radiation-induced compaction and plastic flow of vitreous silica
A. Benyagoub, S. Klaumünzer and M. Toulemonde 449
Defects in SiO_2 glass irradiated with high energy Ar ions
Z. Zhu, Y. Jin, C. Li, Y. Sun, C. Zhang and Q. Meng 455
Adhesion enhancement of thin gold films on sapphire by electronic processes using atomic and fullerene ions
S.M.M. Ramos, S. Bouffard, B. Canut, S. Della-Negra and M. Toulemonde. 462

IV. Radiation Chemistry

Track size and track structure in polymer irradiated by heavy ions
P. Apel, A. Schulz, R. Spohr, C. Trautmann and V. Vutsadakis 468
Ion transmission – new technique for analysis of ion tracks in polymers
J. Vacik, J. Cervena, V. Hnatowicz, D. Fink, P.Yu. Apel and P. Strauss 475
Molecular orientation in heavy ion tracks
M. Eßer and J. Fuhrmann 480
Transport processes during the incubation time of ion track etching in polymers
D. Fink, S. Ghosh, R. Klett, K.K. Dwivedi, Y. Kobayashi, K. Hirata, J. Vacik, V. Hnatowicz, J. Cervena and L.T. Chadderton 486
Crosslinking of polysilanes by ion beam irradiation
V. Herden, S. Klaumünzer and W. Schnabel 491
Swift heavy ions on polymers: Hydrocarbon gas release
V. Picq, J.M. Ramillon and E. Balanzat 496
Study on evolution of gases from Mylar under ion irradiation
D.K. Avasthi, J.P. Singh, A. Biswas and S.K. Bose 504
Study of LiOH etching of polyethyleneterephtalate irradiated with 11.4 MeV/amu Pb ions by neutron depth profiling and alpha particle transmission
J. Vacík, J. Červená, V. Hnatowicz, D. Fink and P. Strauss 509
Growth of potassium iodide single-crystals using ion track membranes as templates
D. Dobrev, J. Vetter and R. Neumann 513

V. Radiation Biology

Is delayed genomic instability specifically induced by high-LET particles?
I. Testard and L. Sabatier. 518

Direct time-resolved measurement of radical species formed in water by heavy ions irradiation
G. Baldacchino, S. Bouffard, E. Balanzat, M. Gardès-Albert, Z. Abedinzadeh, D. Jore, S. Deycard and B. Hickel 528
Monte-Carlo simulation of ion track structure in water: ionization clusters and biological effectiveness
C. Champion, A. L'Hoir, M.F. Politis, A. Chetioui, B. Fayard and A. Touati 533
Verification of heavy ion dose distributions using thermoluminescent detectors
O.B. Geiß, M. Krämer and G. Kraft 541

VI. Applications

VIa. High-T_c Superconductors

Improvement of the vortex pinning properties by increasing the size of columnar defects
S. Hébert, V. Hardy, M. Hervieu, G. Villard, C. Simon and J. Provost 545
Influence of splayed distributions of columnar defects on the pinning properties of Bi-2212 single crystals
S. Hébert, V. Hardy, G. Villard, C. Simon and J. Provost 551
High energy heavy ion irradiation damage in oxide superconductor $EuBa_2Cu_3O_y$
A. Iwase, N. Ishikawa, Y. Chimi, K. Tsuru, H. Wakana, O. Michikami and T. Kambara 557
Magneto-optical study of flux-line pinning in superconductors with linear defects
H. Kuhn and S. Klaumünzer 565
Vortex dynamics in $Bi_2 + xSr_2 - (x+y)La_yCuO_6 + \delta$ and $Bi_2Sr_2CaCuO_2O_y$ irradiated with heavy-ions: correlation between the Bose-glass behavior and the coupling of pancake vortices
N. Kuroda, N. Ishikawa, S. Okayasu, A. Iwase, H. Ikeda, R. Yoshizaki, T. Kambara 572
Flux pinning by columnar defects in $Bi_2Sr_2CaCu_2O_{8+d}$ single crystals and annealing effects
C. Müller, P. Majewski, S. Klaumünzer and F. Aldinger 577
Heavy ion induced columnar defects: a sensitive probe for the behaviour of vortex matter in high-temperature superconductors
G. Wirth, F. Hillmer, G. Jakob, E. Jäger, E. Schimpf and H. Adrian 581

VIb. Electronic and Magnetism

Computer-forgetfulness, cosmic radiation and an ion-microscope
B. Fischer, J. Barak, E. Adler and S. Metzger 587
Single event burnout of high-power diodes
K.H. Maier, A. Denker, P. Voss and H.-W. Becker 596
Detection of δ-electron events in charge coupled devices: a fingerprint of single swift heavy ions
M.M. Meier, J.-U. Schott, K. Strauch and K.-O. Groeneveld 601
Application of an ion microbeam to determine the radial carrier density in an ion track
O. Musseau, V. Ferlet-Cavrois, A.B. Campbell, A.R. Knudson, S. Buchner, B. Fischer, M. Schlögl 607
New perspectives of transient field measurements using amorphous iron–boron compounds
A. Gohla, K.-H. Speidel, R. Ernst, U. Grabowy, B. Heller, G. Jakob, J. Gerber and P. Maier-Komor . . 613
Correlation between local magnetic and structural properties at the Ni/Pd interface
K. Potzger, H.H. Bertschat, A. Burchard, D. Forkel-Wirth, H. Granzer, H. Niehus, S. Seeger and W.-D. Zeitz, ISOLDE Collaboration 618

Author index 625
